

# 快速上手

下载

<http://www.jetbrains.com/idea/download/#section=windows>

破解, 用虚拟服务器方式

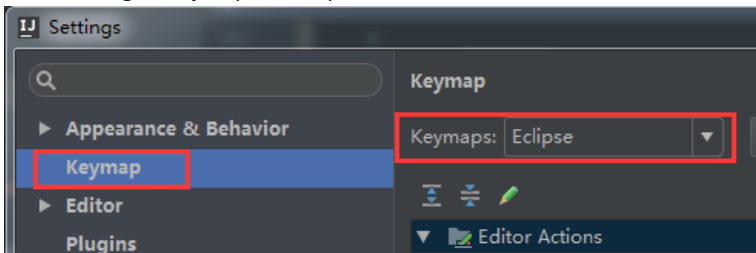

<http://blog.csdn.net/oppo5630/article/details/52199289>

教程

<https://github.com/judasn/IntelliJ-IDEA-Tutorial>

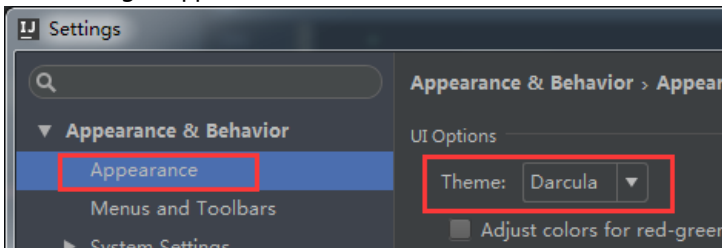

设置eclipse快捷键

File - Settings - Keymap选择Eclipse

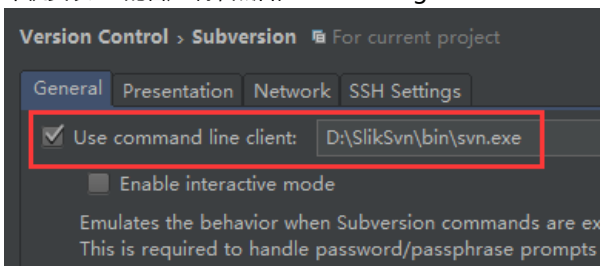

背景黑色

File - Settings - Appearance

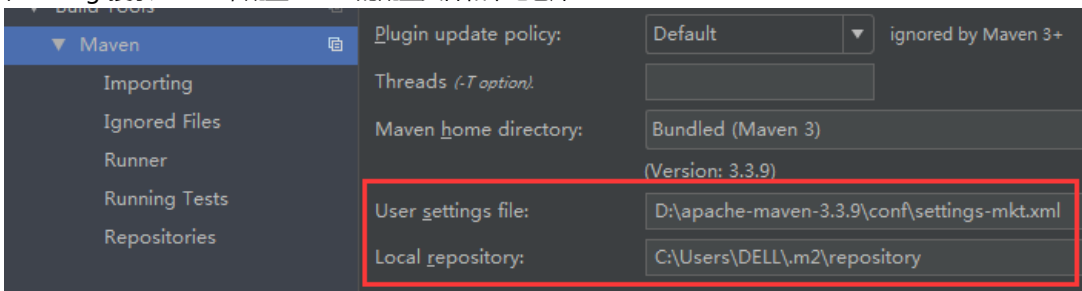

配置svn

本机安装svn的客户端, 然后在File - Settings - Version Control - Subversion配置

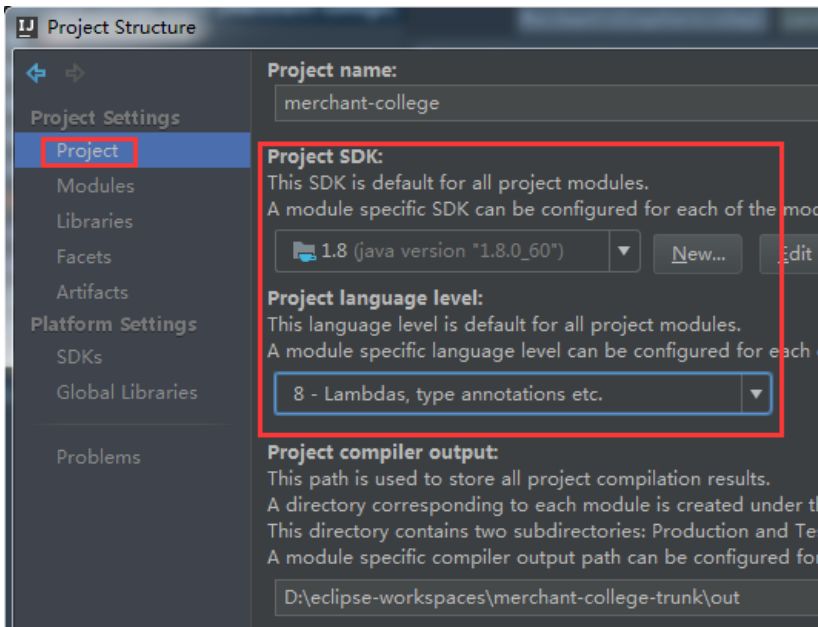

配置Maven

在Settings搜索Maven, 配置maven的配置文件和本地仓库

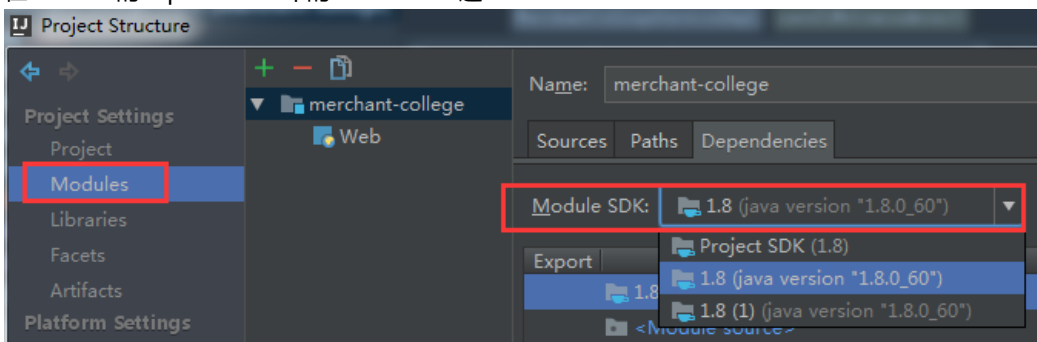

配置项目jdk

对着项目右键, 选Open Modules Setting, 在Project Settings下的Project这样设置:

在Modules的Dependencies下的Module SDK选1.8

并且在Sources下的Language Level选择8 - Lambdas , type annotation etc.
